

Are there any specific issues relative to licensing that should be addressed in the law?

Currently we pay one of the highest licensing fees in the country, our fees should be based on the national average and commensurate with an individual winerie's production levels.

NOTE!

I am scheduled to present at the Mobile hearing and i will be discussing the Colorado Wine Development Act. I will provide each member with a copy of the law and I will develop a **draft** copy of how a Alabama version would read.
